

# NTN Curriculum Framework Overview

New Tech Network

## PLANNING TOOLS HELP REALIZE BETTER OUTCOMES

*The NTN Curriculum Frameworks are comprised of models and templates that help teachers craft an effective Project-Based Learning curriculum.*

### YEAR-AT-A-GLANCE

A high-level overview of a year-long sequence of projects.

### PROJECT SNAPSHOTS

An overview of each project listed on the Year-at-a-Glance that includes an estimated timeline, power learning outcomes and standards, project scenario, and key assessments.

### PROJECT PLANNING TOOLKIT

This robust template provides the granular details that help teachers design and execute a project. The toolkit is broken down into five categories: begin with the end in mind, design the project scenario, create the path, plan the assessment, and assess before launch.

### ECHO PROJECT FOLDER

Each project has multiple teacher and student-facing materials that are accessed through NTN's learning management system, ECHO. The Echo Project Folder is where students complete activities, collaborate with others, receive feedback, and monitor their progress.

### PRACTICES CARD DECK

The Practices Card Deck is a compilation of key cultural, instructional, and reflective practices that teachers can implement in their classrooms to support student learning.
