

New Tech Teams

Why engage in this work?

Foster deeper learning on your campus.

New Tech Teams are provided one year of teacher access to Echo, our online learning management platform, and a set of projects to serve as models for PBL practice that are ready to be used in the classroom. Teams have access to NTN's extensive library of tools and learning modules to help them build culture, use technology well, and use project-based learning as the primary means of instruction and can supplement their individual learning through our badging course.
